DayMon Download

- Simple installation
- Not intrusive
- Configurable to a preset interval
- Options panel (no other options)
- Easy to use
- Low demands on computer

Installation In order to install this software you will need to have a version of the Windows operating system that supports programs that run under the Windows CE 4.2 Environment. Cracked DayMon With Keygen is compatible with Windows Vista, Windows 7 and Windows 8. To install the software go to Start - Programs - Accessories - System Tools - DayMon. You will need to follow the onscreen instructions to complete the installation. Configuration DayMon is configured by default to display the next scheduled birthday or anniversary of the person(s) that are listed in the "Contacts" folder. In the interface you will notice an arrow, pointing at the day of the week, that contains the arrow. This indicates the number of days until the next birthday or anniversary. By clicking on it you can change the day to the one that is most convenient for you. This feature is available to every user of this software. If you wish to change the configuration of this feature, simply double-click on the DayMon icon to open the configuration window, and then click on the "Settings" tab. The time can be set to the number of days, hours and minutes you wish to have the application display until the day of the next birthday or anniversary. You can also choose between displaying only the day, or the day and month. In any case, the frame is going to stay on top of the desktop and will not obstruct your other work. The "Refresh" interval is the number of days the application will wait before displaying the count. You can set the days, hours and minutes to be displayed for the next scheduled birthday or anniversary. If this interval is set to "0" then the application will not start until the time has passed. Also, if the interval is set to "1" then the application will display only the days, hours and minutes that are indicated in the

"Settings" tab. Thanks to the Windows Vista "Contacts" folder the gadget is able to gather data on birthdays and anniversaries from a very large number of people. It does so by analyzing the data included in the "Contacts" folder. It then builds a table based on the data it gathers, and draws a cute little frame that allows you to easily view the information. This is a very light gadget and it consumes very little resources.

The program can 77a5ca646e

DayMon Activation Key X64

DayMon is a very light gadget for your desktop that displays upcoming birthdays or anniversaries, by gathering data from the Windows Vista "Contacts" folder.
