■ Sketchboard is a simple application that you can use to draw on a whiteboard. It can be used by children for doodling or by adults who want to quickly put an idea in a sketch before forgetting it. Metro app for doodling a whiteboard It's made as a Metro-style program that can be installed on platforms running Windows 8, 8.1 or 10, including tablets and other touch-supported devices. No Internet access is required by this app, so you can open it even when you're offline. Set the brush size and color, use an eraser The whiteboard is initially empty, so you can start drawing right away using your fingers or mouse cursor. To change the brush size and colors, right-click somewhere on the screen to bring up the app commands bars to pick the small, medium or large brush, along with the black, blue, green or red color. There's also an eraser you can use to undo mistakes. Clean the whiteboard or save the drawing to file It's possible to clear the whiteboard as well as to save the drawing to a PNG image. The new picture is automatically placed in a newly created folder called "Sketchs", which can be found in your "Pictures Library" and has the current timestamps in its name. Afterward, you can clear the sketch area and start over or continue working on the current drawing. Unfortunately, there are no settings implemented for modifying the default saving directory and file name pattern. Limited set of features All in all, Sketchboard is a simple and straightforward tool for making doodles on a whiteboard, packed with three brush types, four brush colors, an eraser, and a saving function. However, more features would have been welcomed, even for an app that focuses on simplicity. You can test it for yourself, since it's free. Windows Live Movie Maker (or Windows Live Movie Maker, WLM) is a free app you can use to make movie previews or full-length movies with your webcam. It's the successor to the older Windows Live Photo Gallery, which is also included with Windows 8 and can be downloaded as a free extension for older versions of Windows. Movie Maker is available in two versions: a free trial version and a full version you have to pay for, unless you are using Windows 7 and you already have Movie Maker installed. The free version comes with a limited number of features. You can find Movie

Draw on the whiteboard with your finger or the mouse cursor. Double-tap to erase. You can modify the brush size and color as well as the brush shape. Choose between three brush sizes: 1, 2, or 3 pixels. Choose between four colors: black, blue, green, or red. Find an existing picture in your Pictures Library or draw one from the photos that you have added to your Library. Edit the file name of the picture that is saved. Choose between a picture and a sketch. Afterward, you can save your sketch as a PNG file. A: If I'm not mistaken, this is a Microsoft Office app. It's not just Office. At least according to their installation description: Office apps running on Windows 8 now include many of the best features from the latest version of Office, including a taskbar, improved ribbon, and more. This is a simplified, streamlined version of Office apps on Windows 8. To remove it, you'll have to use the Control Panel. Control Panel -> Programs and Features The chink in the blood-brain barrier: transient capillary permeability associated with mast cell-mediated anaphylaxis. We have recently demonstrated that antigen challenge of rats results in transient permeability of cerebral capillaries in which mast cells and mast cell chymase are present. To determine whether capillary permeability is an exclusive property of mast cells, we now compare capillary permeability and cerebral uptake of horseradish peroxidase in the above model and two others in which mast cells were either absent or present. In the absence of mast cells, no capillary permeability or mast cell-mediated histamine release was observed. In the presence of mast cells, cerebral uptake of horseradish peroxidase increased transiently with antigen challenge. These findings suggest that capillary permeability is caused by vasodilation due to the release of mast cell mediators from anaphylactic mast cells that have penetrated the blood-brain barrier. Using Twitter, Reddit, and Facebook to protest the shutdown of the Boston Marathon The shutdown of the Boston Marathon due to the bombing is not only creating a lot of heartache for victims, families, and the city of Boston, but it is also causing a lot of havoc as Americans across the country prepare
