Reviews of XBOX 360 Controller Manager This product hasn't received any reviews yet. Be the first to review this product! I have the chargebox controller manager and it really works well 10-May-12 The hard part is reading these reviews. You have all these people who are just bashing the program, or praising it based on different experiences. I was so happy when I found the program. It gave me an option to use my xbox controller on the pc with no fuss. The battery life is a bit better than in my original controller. But if you want to run some of the arcade games, or use your controller for racing games, that's a big deal. My advice is to not get it in the first place, or at least try out the power management feature first, then make a decision. Awesome but little glitch 01-May-12 I started using this program recently, and I have to say it is awesome! The only little glitch is that you have to press the button while starting up the program for it to show up in the tray. Still awesome program and I highly recommend it. Microsofts second best gamepad 11-Feb-12 All my gaming I do on a laptop so i dont have the joysticks that use all that rumble on the controller. I have my own gamepad and wireless 360 controller, I had it setup from the get go and didnt have to install any software. It works awesome, battery life is amazing compared to my wireless controller, also it connects to pc better, the only cons are, you can only see the battery level in the gamepad itself, but then you can see it in the application. Also its not in the tray and has to be clicked on. Written by David from united states 31-Jan-13 Microsofts second best gamepad. It connects better and has better battery life than the original gamepad. The only con is that it has to be clicked on. Best of the Best 23-Feb-13 "XBOX 360 Controller Manager is an application that comes with a solution, enabling you to turn off the devices at any time, as well as keep an eye on their charge levels. It is very intuitive and runs quietly in the system tray. Hassle-free utility that can be set up in no time The application consists of a single executable file that you can launch from
